Better Basements

1 Inspired by Nature

Rockwell uses True Texture™ to beautifully mimic stone, so the light source in your basement looks like a landscape instead of an industrial eyesore.

2 Designed for Peace of Mind

Rockwell's Elite and Premier Series are egress compliant. With built-in steps, you will always know there's a safe and easy way to escape your basement.

3 Maximum Durability

Every window well is made of a one-piece rigid composite construction. Making them completely resistant to the elements. Whether it's water, frost, extreme temperature, rust, rot, or UV, your window well won't lose color, or deteriorate.

4 Simple and Seamless Installation

Every window well weighs far less than their steel counterparts and is designed to mount perfectly to the foundation wall of your home.
